# INTRODUCTION

## MARVELLO COLLECTION

Introducing the Marvello Collection Inspired by the timeless elegance of natural marble, the Marvello Collection brings a refined and modern touch to interior spaces. With a smooth, soft-gloss finish and delicate detailing, these surfaces are designed to elevate wall applications with understated luxury. From the classic Marvello to the dimensional richness of Marvello Scultura and other sculpted variations, each surface in this collection is crafted to offer depth, sophistication, and a seamless aesthetic. Ideal for creating serene, elegant interiors Marvello is where subtle beauty meets exceptional craftsmanship.

EVOLVING INDUSTRY SINCE LAST

# 30+ YEARS

With over three decades of excellence, EVVOLUTION has established itself as a leading name in the tile industry. Our journey began with a vision to blend quality with innovation, and today, we proudly offer a wide range of tiles that reflect timeless beauty and modern sophistication. From walls to floors, interiors to exteriors, our products are designed to inspire creativity and durability. Our legacy is built on trust, precision, and a relentless commitment to evolving with trends while staying rooted in craftsmanship.

At EVVOLUTION, every tile we create tells a story — a story of passion, precision, and perfection. Our team continuously strives to push boundaries, using advanced technology and sustainable practices to deliver products that meet global standards. Whether it's a residential haven or a large commercial project, EVVOLUTION tiles promise to add elegance, character, and value to every space they touch.

PORCELAIN **INSTALLATION GUIDE**

Installing porcelain tile is a process; proper preparation of the base is an absolute necessity for a successful installation. Don't let this dissuade you from a DIY porcelain tile installation! Below are instructions on how to complete your project successfully.

**PREPARE**

- 1.** The success and longevity of tile installation relies on a solid base. Unless you are dealing with new construction, this usually means removing the original flooring material before you install your new tile.
- 2.** Ceramic and porcelain tile should be installed on a clean, level and rigid floor. If your floors flex or have uneven areas, repair and add support where needed. Follow up with a cement board or fiber cement underlayment. Both are resilient to moisture and impervious to liquids.
- 3.** Choose your installation pattern. There are an endless number of options, and the pattern should reflect the overall tone and look you are trying to achieve.

- 4.** Map out your installation. Measure to find the center of a room on two opposite walls and use these points to snap a chalk line across the room. Do the same on the other walls to create perpendicular line, and check to make sure they are square.
- 5.** Dry fit your tile starting from center point, leaving enough spacing for grout joints. The goal is to work with as many full tiles as possible.

**INSTALLATION**

- 1.** Begin laying the tile from the center of the room, using your reference lines as your guide.
- 2.** Spread thinset with the notched edge of a trowel. Larger tiles require more thin set and a larger notched trowel.
- 3.** As you lay your tile, you can use plastic spacers to help ensure you have straight grout lines. You will remove the spacers before the thinset dries.
- 4.** Clean up any excess thinset immediately using the manufacturer's instructions.
- 5.** After a few rows of tile are installed, set them with a tile level and a mallet.
- 6.** As you reach the perimeter of the room, cut and adjust tiles to complete your installation.
- 7.** Allow the tile to set according to the manufacturer's instructions. Grout the tile.
- 8.** Clean the tile surface with a damp sponge and clean water.

**MAINTENANCE TIPS**

As with any flooring material, general cleaning techniques of porcelain and ceramic tile depend on the surface, texture and condition of the surface. Water and a soft sponge will usually be enough to clean the surface of MS International ceramic and porcelain products.

If you clean with something other than water, however, opt for a neutral pH cleaner that will not affect the finish. You can find neutral cleaners at most home centers and tile showrooms. Always test the cleaner on a small area first. If tile or stone is heavily soiled, we recommend that a professional cleaning company determines the proper cleaning technique.
